

Morning meeting 10.12.2024

Attendance: Daníela, Hreimur, Jón, Kormákur, Tumi, Yeabsira.

Today we discussed a lot about the status of the project and mostly focused on what is missing based on the requirement list. Jón and Yeabsira were fixing the list yesterday and got a list of all the requirements that were missing and we discussed which we should be finishing first and which don't matter as much.

Today the main goal is to finish at least the A requirements from the list before we start to focus too much on B and C requirements.

The list, A Requirements are high priority, B Requirements are medium priority and C Requirements are low priority:

### A Requirements

- >Price.lower error in maintenance reports: Requirement 32. **Hreimur completed**

- >Amenities will be a property. **Will just add amenities like properties**

- >Able to look up maintenance reports after completion (Needs to make completing maintenance reports): Requirement 19. **Hreimur completed (is now adding it to a list)**

- >Able to edit an incomplete maintenance reports information if it is not accepted . (there is no button for employees to edit maintenance reports, and does not work to mark as ready): Requirement 34, 35

- >Able to quit and go back a page (W.I.P. already implemented in a few menus but is being added to all by Kormákur): Requirements 39 and 40.

### B Requirements

- >Able to refer to a contractor in a maintenance reports (Price.lower error might work if its fixed): Requirement 36

- >Able to look up contractors information. (Only has give warning and edit): Requirement 47

>Able to look up contractors information. (Needs to be able to select contractor): Requirement 48.

>Able to look up contractors former work requests. (Not implemented needs more information): Requirement 49.

>Needs a bunch of information and look ups by date on contractors: Requirements 50 and 51

## C Requirements

>Able to assign warnings to contractors for bad performance (button does not do anything): Requirement 28.

>Able to create ascii art. (not sure about the status): Requirement 30.

>Able to request approval for maintenance reports from manager. (Cant mark as ready so request for approval doesn't work): Requirement 37.

>Able to look up employee by name: Requirement 52.

>Able to look up work requests by keywords: Requirement 53.

>Able to look up maintenance report by keyword: Requirement 54
